EUREKA[™]
KIKUYU PBR

Why choose Eureka Kikuyu PBR?

An economical, all rounder kikuyu grass

Eureka Kikuyu PBR is a new strain of kikuyu grass developed by Lawn Solutions Australia. Eureka Kikuyu PBR has been developed to provide a high quality surface with less inputs than other kikuyu grasses on the market.

With so many kikuyus now commercially available on the Australian turf market, Lawn Solutions Australia has used its extensive research and development resources to develop a new kikuyu that meets the market requirements for Aussie families and their lawns.

Eureka Kikuyu PBR is also a great solution for planting out larger areas and as erosion control given the rapid spread of its runners in favourable conditions. Its tolerance of waterlogged soils can also make it the best choice for transpiration areas.

Good for home lawns, racecourses, parks and reserves, golf tees and fairways.

Quick repairer

Preferring a sunny aspect, Eureka Kikuyu PBR is a dense, rapid growing lawn. Its vigorous growth habit allows it to repair very quickly if damaged and it is able to establish a strong, deep root base to help it stand up to the hottest summer days.

It holds its colour well into winter. It will brown off when frost affected but bounces back with full vigour in spring.

Eureka Kikuyu enjoys a long growing season and with regular mowing will hold a good tight growth mat.

Why is Eureka Kikuyu PBR a great choice?

- ✓ It is a true male sterile
- ✓ Improved disease resistance
- ✓ Improved resistance to kikuyu yellows and slime mould that affects most other kikuyu varieties
- ✓ Excellent tensile strength
- ✓ Requires less water and fertiliser than most common kikuyus
- ✓ Winter active and maintains good colour in cooler climates
- ✓ Quick regrowth coverage
- ✓ Has an extensive root structure for improved drought tolerance
- ✓ Recovers quickly from heavy wear
- ✓ Great mowing versatility for sports field use (8mm and above)
- ✓ Will not suffer extreme thatch like other varieties
- ✓ Performs well on a large range of soil types
- ✓ Is a pure strain of improved kikuyu
- ✓ Developed in Australia by Australian turf farmers
- ✓ Reduces the need to overow
- ✓ Grown under Australia's only national turf certification program – AusGAP
- ✓ Great sod strength making installation a breeze
- ✓ High disease resistance
